## Introduction

At the Temple University Collaborative, we recognize the power of community and connecting with others! For individuals with mental health conditions, social connections and engagement in the community are important tools for improving health and supporting one's recovery. One way to connect with the community is to engage with people who share your identity. Across the United States, LGBTQ+ (Lesbian, Gay, Transgender, Queer,<sup>1+</sup>) organizations work tirelessly to promote community participation, advocacy, and support for individuals of all identities. Their services are especially critical given that LGBTQ individuals face higher rates of stigmatization and family rejection than their peers. A 2023 survey of LGBTQ+ young adults found that they were twice as likely to report not being close with their immediate family members as compared to non-LGBTQ+ young adults.<sup>2</sup>

Given that these individuals are less likely to have a supportive family community, organizations dedicated to queer inclusion serve as essential safe spaces and means of connecting to supportive chosen family, which has positive outcomes for mental health. In fact, a 2022 study found that for queer individuals, involvement in LGBTQ community was associated with lower levels of loneliness and served as a protective factor against the negative impacts of marginalization.<sup>3</sup> Recognizing the critical role of community support, this list highlights one LGBTQ+ community organization from each state, showcasing their efforts to foster inclusivity, provide essential resources, and create welcoming and fun social spaces. From pride events to legislative advocacy and mental health support, these organizations play a crucial role in bringing people together and strengthening communities across the country.

The list is broken down into 5 regional maps and subsequent brief descriptions of the highlighted organizations. You can also [access the full map here](#). The names of each organization below are linked to their website. For additional resources, check out [CenterLink's website](#) for a more extensive list of LGBTQ centers and organization.

<sup>1</sup> A note on the inclusion of the word 'queer': while the term has carried pejorative connotations in the past, members of the LGBT+ community and academic circles are moving to reclaim the word as an umbrella term describing sexual orientations and gender identities that are not exclusively heterosexual or cisgender.
